

I urge you to reject the NAB's petition 04-160. Broadcast radio should not be protected by curtailing the free market. I gladly pay for satellite radio because broadcast radio is nothing but homogenized drivel, McDonald's for the mind. This petition by the NAB is tantamount to an admission that what they broadcast is worthless, since they fear competition from a medium that comes with a monthly bill; i.e., they can't even give away what they are trying to sell.
